## Education

---

**B.Sc. in Information Systems, Addis Ababa University** 02/2023 – 06/2026  
addis, Ethiopia

**Internship, kingdom buisnesses** 06/2025 – 06/2026

- Organization: kingdom buisness
- Role / Position: Developer
- Achievements: Engineered a responsive full-stack corporate web application using the MERN stack (MongoDB, Express, React, Node.js) with dynamic product catalog downloads and interactive UI themes

Relevant courses taken:

- Event-Driven Programming
- Web-Programming
- Object-Oriented Programming
- Mobile Computing
- Databases
- Data Structure and Algorithm
- back-end

### QIYAS-2026-000122

- Training period: 4 months
- Track: Cybersecurity
- **Availability: immediately**
- key competencies: SIEM Log Correlation, Network Threat Monitoring, Version Control (Git/GitHub)

## PROFESSIONAL SUMMARY

Information Systems graduate from Addis Ababa University with technical experience building scalable full-stack web applications (MERN stack) and engineering enterprise security operations labs. Skilled in React, Express, MongoDB, RESTful APIs, RBAC governance, and enterprise monitoring using pfSense, Wazuh SIEM, and Suricata IDS/IPS[cite: 6]. Passionate about secure software engineering and defensive cybersecurity, seeking full-time opportunities

## Languages

- **Amharic:** Native / Full Professional Proficiency
- **English:** Professional Working Proficiency

## Projects

---

### food management system

- A vendor and customer management system that aims at optimizing major business functionalities and creating a good customer relationship
- database features with microsoft sql management server
- both customer side and vendor side

Technology used: microsoft sql server and c#

## Project Management system

- implements javafx
- teacher-student project management system that simplifies project submission
- implements crud operations
- utilized Microsoft SQL server
- has multi user functionality(student , teacher...)

Technology used: java

## portfolio

- Features include a project gallery, contact form, downloadable CV, and dark/light mode toggle.
- gives links to all projects and their respective github repository
- Implemented responsive layouts and animations to enhance user experience across all devices.
- Deployed via github with continuous deployment from Git.

Technology used: React.js,tailwind

## kingdom buisness website

- Implements the MERN stack
- Has both back end and front end features
- A business website with all with essential pages(home,contact us, about us) and contains features such as downloadable product catalogue, dark/light mode
- Modern looking front-end made by tailwind

Technology used:MERN(Mongodb,React,express,nodejs)

## Enterprise SOC & Network Security Monitoring Lab

- Engineered an enterprise-grade security operations lab
- integrating pfSense firewall routing
- Suricata IDS/IPS threat inspection
- Wazuh SIEM log correlation, and automated incident triage

Technology used: pfSense, Suricata, Wazuh SIEM, Shuffle SOAR, OpenSearch, Kali Linux, Git

## Knowledge Management System (KMS)

Built a full-stack MERN KMS featuring hypothesis-driven experiment tracking, native Amharic/English localization, and RBAC governance

## Skills

---

**JavaScript, tailwind, CSS, React.js, Git, C++**

— Proficient

**Git, GitHub** — Competent

**pfSense** — Competent

**nestjs, express** — Competent

**Wazuh SIEM** — Competent

**Suricata IDS/IPS** — Competent
